PROFESSIONAL SUMMARY

Computer Science graduate (University of Central Punjab, CGPA 3.60/4.00) with hands-on experience in back-end software development, object-oriented programming, and full-stack engineering. Skilled in designing, implementing, and maintaining scalable, top-tier software applications using Python, Java, JavaScript, and C++, with a strong foundation in data structures, algorithms, and both SQL and NoSQL databases. Experienced in debugging, testing, and deploying production applications, participating in code reviews, and collaborating in Agile, team-oriented environments. Proficient with Git, GitHub, GitHub Actions, Docker, and CI/CD pipelines for reliable software delivery.

EDUCATION

Bachelor of Science in Computer Science

Sep 2022 - Jul 2026

University of Central Punjab (UCP), Lahore | CGPA: 3.60/4.00

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Systems, Software Engineering, Machine Learning, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, HTML/CSS

Back-End Development: Django, DRF, Node.js, Express, RESTful API design, JWT authentication, OOP principles (inheritance, encapsulation, polymorphism, abstraction)

Databases: MongoDB, MySQL, Firebase Realtime Database, schema design, query optimization

DevOps and Tools: Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, Agile/Scrum, debugging, unit testing, code review

Other: React, React Native, Next.js, HuggingFace Transformers, PyTorch, NumPy, Pandas

WORK EXPERIENCE

Tri Tech Technology LLC - Full-Stack Developer Intern

Jul 2025 - Dec 2025

On-site | Lahore, Pakistan

- Applied OOP and modular design principles to architect a scalable POS ecosystem with two connected front ends (POS and Admin Panel) using Next.js, React, and TypeScript
- Designed and implemented a Node.js/Express back end with MongoDB, writing optimized NoSQL queries for order management, analytics, and client data
- Developed RESTful APIs with JWT authentication, middleware architecture, and structured error handling following Agile development practices
- Debugged, tested, and deployed the system for two live restaurant clients (CAP Cafe and Extraction), ensuring software quality, performance, and reliability
- Used Git and GitHub for version control, participated in code reviews, and contributed to continuous process improvements

PROJECTS

TRAK: AI-Powered News Credibility Platform

Jan 2026 - Present

- Architected a full-stack mobile application using React Native and Django/DRF with MongoDB, applying OOP design patterns and modular back-end architecture throughout
- Fine-tuned RoBERTa and DeBERTa transformer models on 220K+ labeled samples for three-class credibility classification (real, fake, suspicious), covering data preprocessing through evaluation
- Built an end-to-end automated pipeline covering news scraping, NLP preprocessing, credibility classification, and personalized feed delivery
- Implemented JWT authentication, role-based access control, text summarization, and text-to-speech features; used Git/GitHub for version control and iterative debugging and testing
- Tech: React Native, Django, DRF, MongoDB, Python, HuggingFace Transformers, JWT

POS Ecosystem: Full-Stack Multi-App System

Jul 2025 - Dec 2025

- Built a complete POS and Admin Panel system deployed across two live restaurant clients using Next.js, Node.js/Express, and MongoDB
- Designed a scalable database schema and RESTful APIs supporting order management, menu and recipe handling, and analytics modules
- Followed Agile development practices, with regular debugging, testing, and code review cycles prior to each client deployment
- Tech: Next.js, React, TypeScript, Node.js, Express, MongoDB, JWT, Tailwind CSS

Language Learning App

Jan 2025 - Feb 2025

- Built a gamified Android application in Java using OOP class hierarchies, ViewBinding, and RecyclerView; integrated Firebase Authentication, Realtime Database, Storage, and Analytics with social login
- Tech: Java, Android SDK, Firebase, OOP

CERTIFICATIONS

AI Fundamentals - Google (via Coursera), Apr 2026

Fundamentals of Agents: Unit 1 - HuggingFace AI Agents Course, May 2026
